Who we are

Wizbeam Technologies is a software company in Lahore, Pakistan. We design, build and support the systems businesses run on: CRMs, websites, custom software and cloud infrastructure, each shaped around how the business actually works.

We start every engagement with a discovery call, plan openly, build in stages with regular demos, and stay involved after launch with training and support.

What we do

CRM Solution

Leads, customers and sales pipelines in one tailored system.

Web Solutions

Fast, search-optimized websites, portals and online stores.

Custom Software Development

Internal tools and platforms built around your process.

Cloud Solutions

Migration, hosting, backups and monitored infrastructure.

Ready-made solutions

Clinic Management System (CMS) · Inventory & Stock Management · Gym & Fitness Management · Field Service & Operations

Selected projects

HEALTHCARE

Clinic management platform

Appointments, patient records and billing for a multi-doctor clinic, replacing paper registers and three disconnected spreadsheets.

Highlights

- Online appointment booking
- Patient history at reception
- Automated invoices and reports

RETAIL

Inventory & stock management system

Real-time stock levels, purchase orders and supplier tracking across multiple store locations.

Highlights

- Live stock across branches
- Low-stock reorder alerts
- Supplier and purchase records

BUSINESS SERVICES

Company website & CRM

A fast, search-optimized website connected to a CRM that captures and tracks every lead automatically.

Highlights

- Lead forms straight into the CRM
- Page speed and SEO foundations
- Sales pipeline dashboards

Selected projects (continued)

FITNESS

Gym & fitness management system

Memberships, class schedules, trainer rosters and check-ins for a growing fitness studio.

Highlights

- Membership plans and renewals
- Class scheduling and booking
- Front-desk check-in screen

FIELD SERVICES

Field service & operations app

Job scheduling, team dispatch and on-site job tracking for a maintenance company.

Highlights

- Drag-and-drop job scheduling
- Technician mobile access
- Job status and completion reports

LOGISTICS

Cloud migration & managed hosting

A planned move from an aging office server to monitored cloud infrastructure with tested backups.

Highlights

- Near-zero downtime migration
- Automated daily backups
- Uptime monitoring and alerts

Let's build what your business needs next.

Book a discovery call and we will help you find the right solution.
